EDUCATION

B.Sc. Industrial Engineering & Management
Ben-Gurion University of the Negev
2023–2027 | 4th Year Student

MCI | The Entrepreneurial School
Student Exchange Program
2026

"Hadarim" High School, Hod Hasharon

- Graduated with honors
- Major in Mathematics, English and Physics

2018

TECHNICAL SKILLS

Programming & Design Tools:

- Python
- R
- Java
- C#

Data & Analytics:

- SQL
- Power BI
- Tableau
- Excel
- BigQuery

Workflow & CRM Management Platforms:

- Salesforce
- Monday.com
- Github
- Jira

CERTIFICATIONS

VC Analyst - Cactus Capital Academy

- Selected for a highly prestigious program focused on venture capital and startup evaluation.

CAAI - Civil Aviation Authority of Israel

- Certified Remote/UAV Pilot up to 4 kg.

LANGUAGES

- Hebrew - Native
- English - Professional Level

PROFILE SUMMARY

Industrial Engineering & Management student with hands-on experience in data analysis, statistical modeling, and machine learning workflows. Experienced in analyzing large-scale datasets using Python, R, and SQL, validating data quality, detecting anomalies, and transforming complex data into actionable insights. Passionate about leveraging data and AI to solve complex problems.

WORK EXPERIENCE

Research Assistant 2026
Ben-Gurion University of the Negev

- Analyzed large-scale clinical datasets using statistical analysis and machine learning techniques to evaluate motor recovery following stroke.
- Developed and implemented statistical and machine learning models to derive objective rehabilitation metrics and improve dataset quality.
- Presented analytical findings and insights to researchers, supporting data-driven research and clinical decision-making.

Data Analyst (Reserve Duty) 2024 - 2025
Sky Rider Association's

- Built Power BI dashboards to track KPIs and monitor operational performance.
- Presented analytical insights and KPI trends to stakeholders, supporting operational and data-driven decision making.

Technical Presale 2022 - 2023
iSTAR UAV , AVNON HLS GROUP

- Analyzed customer requirements and operational workflows to define technical solutions and support product improvements.
- Led product demonstrations, communicating complex technical features clearly and aligning them with customer use cases.
- Collaborated with R&D and product teams to translate customer feedback into product improvements and technical requirements.

QA analyst & Robotics Field Operator 2021
Ffrobotics (USA)

- Performed field and system testing to assess product reliability, performance, and operational effectiveness.
- Analyzed system behavior, investigated anomalies, and identified root causes using data-driven analysis.
- Worked closely with engineering and product teams to improve product quality and optimize system performance.

MILITARY SERVICE

UAV operator 2018 - 2021
"Sky Rider" special unit in the IDF

- Operated real-time UAV intelligence missions in high-pressure and dynamic environments.
- Analyzed aerial intelligence data to identify operational patterns and support mission planning.
- Demonstrated strong analytical thinking and rapid problem-solving under time-sensitive conditions.

VOLUNTEERING

Summer Camp Counselor 2021
The Jewish Agency for Israel, Camp Livingston – Ohio, USA

- Provided mentorship and support in a multicultural environment, fostering strong camper relationships and leadership development.
